**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 12, 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Isota (5,142,240) or Sigmon et al. (6,157,253).

Regarding claim 1, Isota (Fig. 4) discloses an amplifier circuit comprising: an envelope detector (20) coupled to input (1); a control circuit (30) for controlling variable voltage (40).

Regarding claims 1, 12, 16, Sigmon et al. (6,157,253) disclose an amplifier circuit having a variable output supply (340) comprising: an envelope detector (220) having plurality of outputs (232) coupled to input (205); a comparator (230) can be read as a controllable source coupled to the envelope detector (220); and an (390) having gain controlled by the variable supply (340).

***Allowable Subject Matter***

Claims 2-11, 13-15, 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Claims 2-11, 13-15, 17-19 are allowed over the prior art because none of the prior art disclosed or suggested showing the particular structure and/or operation recited in these claims namely:

Claims 2-11 call for, among others, a schematic of a controllable source; an analog follower; a DSP claimed.

Claims 13-15 call for, among others, a linearization circuit.

Claims 17-19 call for, among others, step of removing a portion of nonlinear component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional reference (Shaw (6,107,880)) shows further analogous prior art circuitry.

This art is deemed relevant and should be carefully reviews before any amendment is filed.
